How To Get Your Personal Copy of Spysweeper 3.2.0 (Build 147) with Licensed Serial.

This is the best Spyware software potection...

1. Copy/paste into your browser the following URL but do NOT press return or Go/Enter button yet.
Code:
http://www.webroot.com/updates/update_safe.php?pc=64150&last=noone&email=YOUR_EMAIL_ADDRESS&mjv=3&mnv=0&origmjv=3&rc=1

2. Edit the above link: Remove YOUR_EMAIL_ADDRESS and insert your email address and then click GO/Enter or press return to go to the URL.
you should see this...

Update Request Successful!

Your free update request has been approved.

An email including download instructions for the update has been sent to the email address you originally used to purchase your software.

**Please note. The update link in your email is only active for 72 hrs. If you are unable to download within that time, you can repeat the update process to receive a new download.

Important Note: If you do not receive an email containing the download instructions within 24 hours, then there may be a problem with our automated email system. If this is the case, please submit a ticket through our Trouble Ticket System and we will send you the download instructions.

Thanks for using Webroot Software

Check your mail and you will see a link to download the latest version and a new serial [that works] to register the software within seconds...

NOTE: Method TESTED & WORKING as of today November 4, 2004 by myself.

How to get your own personal copy of another (ALL) of Webroot's program's ---- all CURRENT VERSIONS:

1. Pick your application(s)

Pop Up Washer
